

Environmental Policy Statement

Safetyform provides Health, Safety and Environmental Risk Management Solutions. We are proud of our continuing development and improvement, and our ability to satisfy our clients' needs.

Safetyform is committed to protecting the environment through the prevention of pollution and continuous improvement in the organisation's environmental management and performance.

Minimisation of environmental impact will be achieved via source reduction or elimination to lessen or avoid waste generation. Where practicable, waste will be reused or recycled. Waste disposal is considered the option of last resort.

Legislative requirements for the environment are the minimal level that will be acceptable to the organisation. Safetyform will set the specific environmental objectives by which the organisation's environmental performance will be measured and we are committed to planning, measuring, reviewing and auditing our environmental management programmes and performance on a regular frequency.

Safetyform's environmental performance will be monitored to evaluate the extent to which we are meeting our objectives. The environmental management system will be reviewed and, if necessary, revised in the light of legislative, technological or organisational changes to ensure that it remains relevant and appropriate to the organisation's needs.

There is commitment to providing environmental leadership through all management levels. It acknowledges that it is responsible for the implementation of the environmental management system and control of the organisation's environmental impacts.

The management will ensure that all those responsible for the environmental impacts have the necessary information, instruction and training in order to carry out their responsibilities and comply with all statutory requirements and codes of practice.

The full details and arrangements of our environmental management system are set out in the Environmental Manual.
