

## FIRE SAFETY CONSULTANCY

Safetyform is a professional and personalised fire consultancy service, developing valuable working relationships with our Clients, Local Authorities, Approved Inspectors and Architects across all business sectors.

Our fire consultancy comprises of two key services:

- Fire Engineering
- Fire Risk Management

Safetyform has been delivering cost effective, value engineered fire safety solutions globally to clients across all business sectors. We continually develop and enhance our services to meet the changing fire safety environment in line with legislation, regulation and findings from incidents of fire around the World, consolidating and refining our service provision to deliver the most up to date, compliant and fit for purpose provisions to benefit clients' needs and requirements.

Our team of highly skilled fire consultants have been involved in the fire safety engineering design and fire risk management for large and complex global projects over a range of sectors including Commercial, Hospitality, Healthcare, Educational, Retail, Assembly, Industrial and Residential.

By working closely with our valued and respected clients, our experienced and highly skilled fire consultants, assist clients in achieving their goals through deliverance of buildings which meet client needs are fit for purpose within specific design guides which achieve, deliver and promote regulatory compliance through all stages of the 'buildings life' from concept, design, construction, hand-over and use.

## WHAT WE OFFER

Safetyform offer the complete range of fire safety services across two specialist divisions:

### Fire Engineering Service

Our Fire Engineering Division provides cost effective solutions that meet regulatory requirements and safeguards people, property and businesses.

The objective being to provide a solution which combines efficiency and flexibility during the building design stages meeting the requirements of Building Regulations Approved Document 'B' through the provision of:

- "RIBA" Stage 3 and 4 Fire Strategies
- Fire System Design Plan Reviews (suppression, fire alarm, emergency lighting)

Value Engineering (creating opportunities to save costs)

### Fire Risk Management Service

Our Fire Risk Management Division has consultants who are highly skilled, specialising in fire safety management to assist clients in meeting their statutory obligations and a regulatory compliant status of the Regulatory Reform (Fire Safety) Order 2005.

The strength of the services we offer lies in the wide spectrum of experience and knowledge of our team of consultants in delivering:

- Fire Risk Assessments
- Emergency Planning and Fire Plans
- Fire Safety and Fire Awareness Training
- Fire Policies and Fire Management Plans
- Fire Investigation
- Reduction in unwanted fire alarm activity
- Arson Protocol Design

## WHY SAFETYFORM

Safetyform are specialist fire safety service providers, we do not simply focus on project delivery, we support our clients on fire safety governance to ensure the client and their organisation have the correct and appropriate provisions in place to discharge their duties and responsibilities under the Regulatory Reform (Fire Safety) Order 2005.

We have national coverage through our network of experienced Fire Consultants and Fire Engineers meaning we cost effective in our service delivery to large multi-site organisations.

Our network of Consultants and Fire Engineers are all ex-senior Fire Service Officers with an enforcement and prosecution background. All have trained at the Fire Service College with a number having been employed as tutors at the College.

Our services, experience, knowledge and skill base dictate our Consultants and Engineers are in high demand as clients strive to secure the services of a fire safety provider who has the competence, capability and confidence to deliver a compliant, dedicated and bespoke fire safety solution.
